Version 20 News Letter

Bizz Wizz has released Version 20 with lots of new features.   This is the 20th Windows version we have now produced not including the 10 DOS versions. 30 years of improvements are now incorporated into Bizz Wizz

Listed below are some of the changes in Version 20, (There are many more un-documented)

New Customer History Drop-Down Box

Invoicing

There is no need to re-find a customer from the data base just pick them from the new customer history drop-down box.

More Quick list options have been added to the invoicing list screen (Jobs, Quotes, Backorders and Layby's)
On screen signing for goods can now be done if you have a touch screen or an add on touch screen.
A Refresh button has been added to some of the listing screens to insure your list is up to date with changes.
More options for printing and emailing of bulk invoices to customers or just 1 invoice from the list screen.
Job list print outs now include the top 4 lines on the job card, telling you more about the job to be done.

Creditors

No need to re-find a Supplier from the data base just pick them from the new Supplier history drop-down box.
Sub-contractors can now be tagged as reportable to the ATO and a file sent to the tax web site with balances.
Paid records can be returned to creditors from the ledger or just listed for 1 person or company if needed.

Bookkeeping Ledger

New Multiple Transaction Change & Move options and a Return to Creditors option give you greater flexibility.
When adding a new or changing a transaction the transaction list stays in the background for reference.

We can supply
Hardware at
great prices...

Call us with your requirements.

P.T.O

Wages

Improvements have been made to the Pay Run screen and the Tag to pay screen in Tax & Super override fields.
The ATO year-end Summary Statement can now be created as a file and sent or posted to the Tax Office web site.
You can now email Pay slips when committing the Pay Run.
A Pay slip can now have notes attached for each employee.

Point Of Sale

Now barcodes produced by weight scales eg.(a deli counter) can be scanned into Bizz Wizz Point of Sale.
Staff can now have a pin number to use the Point of Sale. (Pin on each sale OR login then logout).
The on screen keyboard has been expanded in POS for customer input so a keyboard is not needed.
On screen signing for goods can now be done if you have a touch screen or add on touch screen.
Cash out payments can now be done on account multiple payments in the account Invoices list screen.
Bin numbers are printable from archives for re-stocking shelves

Stock

Stock maintenance can now be done by group name when updating data or merging new data files.
Sell prices can now be updated by percentage not just increasing mark-ups. A roll back can also be set first.
You can now import from a data file scanned in by a hand held stock data PDA to do stock takes or stock input.
The file must hold barcode numbers and the quantity.
The Stock list has a new column in the list screen to see if the item is a Stock held item OR Not.

Mobile Invoicing

On screen Signing for goods can now be done if you have a touch screen or an add on touch screen.
A Refresh button has been added to some of the listing screens to insure your list is up to date with changes.

NOTE: Version 20 is free to support plan Members. Update prices will apply only to Non Members.
