Bizz Wizz Software

ABN 58745976212

1-Main Company

Version 18 is Now Available

Take a look at our NEW features in V18

- Bizz Wizz now has builtin 'Log On Help' so we can view your screen and help you with any problems (we use Team Viewer for a safe connection)
- Customer accounts can now hold up to 5 contact names - 5 employed status - 5 Email addresses - 5 phone numbers , fax and mobile numbers.
- Invoice Printouts can now have dual printed addresses for both the Main address and the delivery Address.
- Listing of a Creditor can now show both paid transactions and unpaid transactions
- All Listing Screens can now be set to auto resize to full height or fully maximised.
- Program Screens now look less cluttered with button frames removed.
- Emails can now be sent via SMTP using Gmail , Hotmail and Live mail with new SSL and Port setup options.
- New Pin Numbers for Archive, Set up and Change in POS. Invoicing, Orders and Stock have had the change pin separated so there is 1 for each module.
- Invoicing can now show a stock picture automatically when selecting stock.
- Mobile Invoicing can now re-sync paid Invoices so the mobile user can view all client invoices.
- New "how to Videos" on the web which can also be accessed from the help files.

There's More

We have made many improvements to most sections of Bizz Wizz. A lot of changes are made in the back ground code and are never seen but these changes are just as important as the changes that are seen. Such as new file saving safeguards when networking to stop file errors. Other code like Bulk emailing buffer checking and of course bug fixes as no code is without bugs!.

The Payroll module will now check to see if Super contribution should be added to the wage. Sick leave can now be set to stop accruing at a set number of days per year.

Invoice Totals tab has a new report to give totals for all accounts. Invoicing 'stock find', has been improved along with new editing functions for the invoice page.

Bank ABA files have been tweaked and in the ledger categories can have bank numbers preset or not as per your needs. In the email window the 5 new customer email address has been put into the drop down list of the 'To addresses'.

The Stock book list screen has a new "Refresh" button to quickly see new stock if added over a network.

We can also do on site Training and computer support at $66 per hr for support members and $88 per hr for non support members. We can also arrange a Bookkeeper at $45 per hr. however you may need to get in quick.

. If you need help to do the upgrade on your system just let us know.

(Support members are not charged if we can fix it by logging in remotely!)

NOTE : Version 18 is automatically sent to support plan members.

www.bizzwizz.com.au

Flip out USB stick
Plug it into your usb port
Wait for the Auto play menu to appear.

NEXT

To run software from ' **Auto Play Menu** ' select ' **Open Folder** ' and then open **' CDINSTALL.EXE '.**

Then from the ' **CD Setup Menu** ' click on the ' **Install Full Bizz Wizz** ' button.

NOTE: do not install update unless you have version 18 already loaded. It would be better to un-install and re-install the full copy. Do a backup first, data will not be lost on an un-install and will be there when re-installed.

When installed enter your Serial Number and Computer Number into the Company / Network wizard and if needed any other company names.

To bring data up from older versions click on the ' **Utilities Tab** ' on the main menu and then click ' **Load Old Version**
