

Version 26 News Letter

Bizz Wizz Version 26 Full copy and Trial is now available. Download and use today! (www.BizzWizz.com.au)

This letter only shows Changes from ver25 to ver26 ! If your version is older than 25 read all the old news letters from your version to the new v26 on our News web page.

Here are some of the new changes in V26,

Most of the work done in v26 is in recoding the code and built in tools.

Microsoft has stopped supporting windows 7 and some of the tools used in Bizz Wizz are based on this system so I have re-done a lot of the back end code before they turn off support for these tools. This in turn has made parts of the software RUN FASTER !

This may mean some users may have to update if Microsoft support is turned off.

Due to Covid-19 we have released version 26 early this year but we will still be working on this version and anything Added will come out in updates for v26.

Other than the back end coding we have added the options below at this time.

Loading a new version is now easier

When loading this new version if you have an older version on the same computer the company setups can be pulled in from the last version and the old data files can also be loaded from the company and network wizard instead of using the Load old data option.

Invoicing

Do you need to send your Quotes out as a " Pro Forma Invoice " ? Well now you can in late v25.4 & v26

Stock

When adding stock the Buy price can now be added with or without Tax (gst) by typing a X after the amount. Sell Prices can now be added without Tax (gst) and the tax then added by pressing "C" or "+"

Wages

The ATO's Single Touch Payroll integration is now better in version 26 the client ID is now save in BW with a portal info box that holds all detail needed for the portal.
