

Bizz Wizz Software

ABN 58745976212

Version 19 is now available!

Take a look at our NEW features in V19

Bizz Wizz now has built in 'Log in Help' so we can access your screen remotely to assist you with any problems. (We use Team Viewer for a safe and fast connection)

The Customer accounts hold up to 5 contact names. When Emailing you can now have 3 pre-set email addresses, so your invoices, quotes etc. will be sent to all the pre-set email addresses. Orders and Creditors, each have their own pre-sets.

The Hot Keys are now in the Stock book to enable you to find items quickly and easily.

The Stock book can now be updated by group names for markups, price rises and most optimize options in the Maintenance tab.

Quick List buttons have been added to the main menus of both Invoicing and Orders. A Find by Service person option has been added in Invoicing lists and the Totals tab.

A Cash Out option has been added to the Point Of Sale multi invoice payments form. POS refunds and payouts can be pin protected to stop unauthorised payouts. POS now has a manager bar code pass tag. Just scan, no need to type in pin. (BW can supply tags).

Wages have been included in the Accountants copy Backup and is up to date with new changes to tax rates and options.

The Creditors ABA files [Reference field] is now changeable. Wages can be paid as a multi-payment to the ledger from creditors..

Amounts outstanding can be listed for just the selected account or for the accounts main linked account as well as all other accounts linked to it.

The Orders list screen and printouts now show totals with and without tax.

MOBILE INVOICING

With the release of Windows 8 on Tablets. Bizz Wizz Mobile Invoicing needed to work with an on screen Keypad and the keypads supplied with Windows are to big and hide most of the screen, they also don't have good functionality and scroll control.

To fix this, Mobile Invoicing now has it's own keypad which has all the controls you will need. Permanently on screen or only shown when you need to type in text. Bizz Wizz has made it's keypad to work like a keypad should, with buttons just the right size for your fingers.

You can cut, copy, paste, select-left, select-right, scroll-left and right and more! The Keypad can even move the screen form up or down to allow for the room the keypad uses on screen so the input box you are typing into is seen.

	Undo	Clear	Insert	Select-All	SeL-Left	SeL-Right	Cut	Copy	Paste			[]	Home	End			Tab		
Tab	q	w	e	r	t	y	u	i	o	p	\	Del	Back	-	+	7	8	9		
Caps	Ctrl	a	s	d	f	g	h	j	k	l	;	'	Enter	/	*	4	5	6		
Shift	Alt	z	x	c	v	b	n	m	,	.	Space	.	0	1	2	3	=	Enter		

There's More

We have made many improvements to most sections of Bizz Wizz. A lot of changes are made in the back ground code and are never seen but these changes are just as important as the changes that are seen.

We can also do on site Training and computer support at \$66 per hr for support members and \$88 per hr for non support members. We can also arrange a Bookkeeper at \$50 per hr. however you may need to get in quick.

. If you need help to do the upgrade on your system just let us know.

(Support members are not charged if we can fix it by logging in remotely!)

NOTE : Version 19 is automatically sent to support plan members only.
